## Xévora

### Technical sheet

<b>Composition:</b>	73% Polyester, 27% Recycled Cotton
<b>Weight (m2):</b>	531 g/m2
<b>Width:</b>	140 cm (UNE EN ISO 1773)
<b>Tear strength:</b>	> 350N (ISO 13934-1)
<b>Tear displacement:</b>	< 4 (BS 3320) - < 6 (DIN 53868)
<b>Abrasion resistance:</b>	60.000 cycles (UNE EN ISO 12947)
<b>Pilling resistance:</b>	5, no pilling (ISO DIS 12945-2)

### Notes:

Due to the manufacturing process, there may be differences in color tone between different batches.

### Cleaning instructions:

Programa de lavagem delicada a 30 graus

Não usar soluções com base de lixívia

Não usar máquina de secar

Não torcer ou centrifugar

Não passar a ferro

Indicado para lavagem a seco

Não secar com luz direta do sol

FABRIC PROFESSIONALS

aquaclean<sup>®</sup> Technology is a treatment that enables you to **clean away stains using water only**. This makes for simple maintenance of the fabrics in the minimum of time.

Thanks to Safe Front<sup>®</sup> technology, our fabrics are protected against viruses and bacteria. They have been proven to **reduce viral activity by over 91%** after two hours of continuous contact.

PFCs are artificial substances widely used in the textile industry for their water repellent properties. aquaclean<sup>®</sup> does not use them due to their harmful effects, as we prioritize the **well-being of our customers**.

If a fabric carries the STANDARD 100 label, you can be certain that every component of this fabric has been tested for harmful substances, therefore is harmless to human health. [www.oeko-tex.com/en/our-standards/standard-100-by-oeko-tex](http://www.oeko-tex.com/en/our-standards/standard-100-by-oeko-tex)

These items contain a high percentage of **recycled materials**. Global Standard Recycled certifies that every production process involved in manufacturing reduces the environmental impact and increases a more sustainable world.

The fabrics of the new Colombier Collection are produced with **recycled materials** and one component, which makes them **recyclable**.
